Lexmark's **Top 5 Features**

Lexmark's XC4143, XC4153, XC6153, and XC8163 are based on award-winning largeworkgroup devices but includes advanced functionality that makes them more secure, usable and manageable than ever:

1 **Easy Security Configuration** - Advanced security features guide buyers through network and Wi-Fi configuration before the device connects to a network, ensure proper admin and group permissions, and help limit external network threats.

2 **Data Security** - Support for optional enhanced encryption-key storage safeguards data and helps meet emerging security requirements.

3 **Cloud Management** - Enhanced cloud support means instant compatibility with Lexmark Cloud Fleet Management.

4 **Remote Configuration** - An embedded web server lets you securely manage device functions via compatible browsers, from firmware updates and rebooting to integrated report printing.

5 **Usability** - New capabilities include remote desktop (VNC) support, an improved touch screen interface, and other usability enhancements.
